Day time experience

Meeting and introduction

The first contact is always important! When meeting an Asian elephant for the first time, you have to let them catch your smell. Make them feel comfortable by stroking and talking to them while looking into their eyes.

Feeding the elephant

You might have heard of the saying, 'a way to anyone's heart is through the stomach'. Well, elephants are no exception. Feeding is the easiest way to gain their trust. You will get a chance to feed them while learning their feeding habits and what they enjoy eating the most.

Mud & Sand Bath With Elephant-

Mud & Sand Bath with Elephants is a joyful way to connect with these gentle giants. The mix of mud and sand protects their skin from heat and insects while leaving your skin cool and refreshed. Beside you, elephants playfully splash mud and toss sand with their trunks, creating a lively and memorable experience. With laughter, soft trumpets, and the earthy scent around you, this simple activity becomes a beautiful moment of connection with nature.

Walk with the elephants in the village

Instead of elephant rides, we promote an alternative experience at Elefantastic, where guests get to walk with our elephants in our town. This initiative will hopefully set the precedence to raise awareness towards elephant welfare.

Elephant washing and shower

In the late afternoon, we wash and scrub our elephants. As per the Forest Department of India guidelines, we cannot let you in the Lake with elephants for safety purposes. So instead, you wash and scrub them at the sanctuary. During the shower, guests can sit on the elephant's back while the elephant sprays water from her trunk on them.
